

## Open Studio: **out of order** performing objects

call out for project proposals from an artist or duo to make a site specific installation with kinetic qualities - during the exhibition **out of order** performing objects curated by Milk

date: 25 05 \_ 17 06

location: Arti et Amicitiae

proposal deadline: 27 December

Milk invited Peer Paper Platform to host an AIR during the exhibition **out of order**. The exhibition shows work of a generation of artists who experiment with industrial techniques and forces of nature to generate movement in their work. Their mechanical designs aren't made to come up with innovative solutions but to discover the artistic discipline, form, material, time and space that these techniques have to offer. **out of order** shows installation works by Corine Zomer, Jorrit Paaijmans, Nicky Assmann & Joris Strijbos, Merel Noorlander & Oscar Peters, Art van triest and several workshops + talks will be organised.

You are invited to work in a open studio which is situated inside the exhibition space, throughout the period of the exhibition. You will work towards a presentation of your work, which has to be a kinetic site specific installation. With the aim to 'switch on' the installation during the finissage of the exhibition.

Whilst your main goal is to work on your own project you are encouraged to engage with and make use of the audience visiting the exhibition. **Failure is not really a failure so no problem** as the work process and development of your practise is the goal.
